10"W x 32.5"H

**Spinner Base**

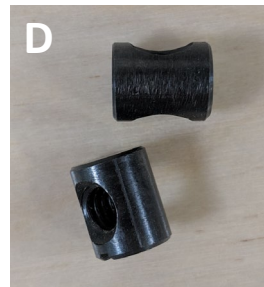

**Tower**

**POPPL2  
Topper**

**POPPL2TB  
Topper**

**Cross Dowels**

**Dowel Rods**

**Bolts**

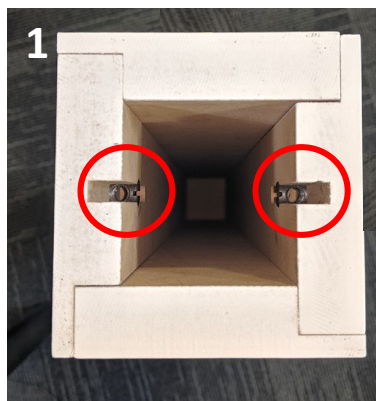

**Allen Wrench**

1. Stand Tower (B) upside down on floor. Insert Cross Dowels (D) into each slot on the inside of the Tower (B). Assure the slits in the Cross Dowels (D) are parallel with the openings of the slots on each side.

**Note:** Holes in the Cross Dowels (D) should be facing up.

2. Keeping the Tower (B) upside down, take the Spinner Base (A) and place on top aligning the holes with the two notches on the inside of the Tower (B).

3. Insert Bolts (F) into both holes in the center of the Spinner Base (A) and tighten using Allen Wrench (G).

**Note:** If assembled correctly, Bolts (F) will interlock with Cross Dowels (D) for stability.

4. Carefully grab the Spinner Base (A) and Tower (B) and flip the display right-side up.

5. Line up Topper (C) with the slit at the top of the Tower (B).

6. Congratulations! Display is ready to load with product.
